Dear Colleague,

BSBMTCT National Clinical Impact Awards Support, 2022

I write to you today concerning the newly reformed National Clinical Impact Awards (NCIAs) and that the BSBMTCT are still a National Nominating Organisation (NNO) who are able to support applications. The BSBMTCT has been allocated 5 NNO ranking/citation places in this round. We are able to support 5 awards in total across the 3 new award levels (level 1 – lowest, level 2 and level 3 – highest).

We have been informed that the 2022 round will now open on Wednesday, 27th April 2022 and will close 5pm on Wednesday 22nd June 2022.

Due to the changes in this new process, please familiarise yourself by viewing the links below regarding the process:

- Applicant guidance: <https://www.gov.uk/government/publications/clinical-excellence-awards-application-guidance>
- Application forms: <https://www.gov.uk/government/publications/clinical-impact-awards-application-form>

If you would like your application to be considered for a BSBMTCT citation, you will need to:

1. **submit your choice on the new ACCIA online platform that you would like support from the BSBMTCT as a NNO** [https://awards.national-clinical-impact.nhs.uk/s Login.jsp](https://awards.national-clinical-impact.nhs.uk/s/Login.jsp)
2. **send in your application form to** julia.lee@kcl.ac.uk

both by midnight Wednesday 25th May 2022, i.e. before Thursday 26th May 2022

We will not be able to consider your application if you do not submit your choice on the online platform, and we cannot provide support if applications are submitted after the deadline. We will notify you if you have been successful or not in receiving support from the BSBMTCT.

The BSBMTCT is grateful to Professor Gordon Cook who will chair the BSBMTCT National Clinical Impact Awards Committee this year with support from members of the BMT community with and without an award and a lay representative. More information can be found on our website.

Best wishes

A handwritten signature in black ink, appearing to read 'John Snowden', is positioned below the text 'Best wishes'. The signature is fluid and cursive, with a long horizontal stroke at the end.

Professor John Snowden, President

The British Society of Blood & Marrow Transplantation and Cellular Therapy
